# DEBATE & PUBLIC SPEAKING

## STARTER (AGE: 5 - 6 YEARS)

This class is perfect for introducing the concepts of public speaking in early childhood education. Your child will develop verbal fluency and confidence to use English regularly through interactive games and oral exercises.

## LOWER PRIMARY (AGE: 7 - 9 YEARS)

This entry-level debate class introduces the fundamental skills and rules of debating to beginners. Through implementing a curriculum designed by debaters from Ivy League universities and current or former national champions, your child will begin to think critically and logically.

## UPPER PRIMARY (AGE: 10 - 11 YEARS)

Budding public speakers and debaters are nurtured into confident and capable orator and debater. Your child will be guided through mock debate, peer brainstorming, and technical exercises. Our coaches will train students with analytical exercise and provide constant feedback, to develop sharp reasoning that enables them to delve into complex local and global issues.

# DEBATE & PUBLIC SPEAKING

## LOWER SECONDARY (AGE: 12 - 13)

Aspiring public speakers and debaters are developed into an impactful and persuasive orator. Your child will experience mock debate, collaborate with their team, and undergo intermediate level technical exercise under guidance by our coaches. Our coaches will hone student's ability to think critically, research thoroughly, and speak persuasively in local and global issues that are nuanced and seemingly abstract and disconnected.

## UPPER SECONDARY (AGE: 14+)

For aspiring competitive debaters and advanced debaters, our students will be graduated into a strong and versatile orator and debater, through regular mock debates, collaboration with their peers, and advanced technical exercises. Taking a personalized approach, our coaches will develop the student's ability to analyze and breakdown any topic swiftly, research efficiently, craft strong and innovative arguments and produce quick and sharp counterarguments in a formal debate.

# IN PERSON COURSES

## OUTDOOR SCIENCE CAMP (AGE 10 - 12)

Nurture your queen. Watch the eggs. Grow your colony.

Go Foraging into the Woods! Through hands-on experiments and field trips (supplemented by online-lesson to develop science process skills and build key knowledge blocks), you will be immersed in the world of physics, biology, and chemistry to kick-start your journey to becoming a scientist.

During our 4-week outdoor camp, students will meet every Tuesday online to build key knowledge blocks necessary for their field work on Thursday. On Thursdays, they will apply what they have learned and make their own observations and scientific inquiries in the nature, test their hypothesis and develop observational and reasoning skills. Students will develop deeper understanding of sciences at work in nature, and how our human existence is intricately tied to the healthy balance of our ecosystem.

## SOCIAL MEDIA COMMUNICATION (AGE 10 -12 | 13 - 15)

In this day and age, technologies and social media are involved to some extent in most aspects of our lives, even if we are not aware of it. This course explores how to be a responsible digital citizen that uses media in healthy ways to give meaning and add value to one's life. We will look at topics such as online identity and digital footprints, cyber bullying and how social media affects our wellbeing.

# NEW ENRICHMENT COURSES

## WRITING (AGE 7 - 9 | 10 -12 | 13 - 16)

---

In this course for 7-16-year-olds, our experienced writing coaches will help students create their first story over 8 lessons. As the lessons progress, our coaches will break down the story writing process and the students will learn not only how to seek inspiration but also plan their own unique stories. Through creating their own adventure, students will learn the essential skills of creative writing such as plotting and crafting authentic characters.

### FOR ADVANCE WRITERS

Taught by the playwright Dr. Heeger, this workshop will take students through the fundamentals of short story writing, from a story idea to a finished piece ready to publish.

In the first part of the workshop, students will read and analyse two classics of young adult literature: *The Boy in the Striped Pajamas* and *A Sound of Thunder*, to learn how published authors create compelling settings, characters, plots, backgrounds and themes. Next, they will practice their learning of these literary devices through guided writing exercises. They will then be ready to draft their own short story for class critique, and refine and format it to be e-published.

## PUBLIC SPEAKING & SCIENCE (AGE 7 - 9 | 10 - 12)

---

Science and language at the same time? Yes, that's right!

This class takes an integrated approach that is designed to foster students' curiosity and inquisitiveness, and simultaneously empower them to articulate and communicate their discoveries and ideas.

The class is divided into four modules each focusing on one topic: the heart in a heartbeat, the science in your environment, chemistry at your home, and the joys and tribulations of a bug's life! These fascinating explorations into everyday phenomena prompt students to ask questions, to look at the world around them through a new set of lenses, to blend into their discoveries the occasional data analysis, and so broaden and widen their perimeters of knowledge.

# ENRICHMENT COURSE

## SHAKESPEARE & DRAMATIC TEXT (AGE 10 - 12)

Myles O’Gorman, theatre director and double-first Cambridge graduate, will present two one-week intensives on Shakespeare, aimed at helping students gain key skills in understanding English Literature whilst also boosting their confidence in public speaking, and learning to use comedy and tragedy creatively in writing for modern audiences.

In Level 1, Myles will focus on comedy. With “A Midsummer Night’s Dream’ as the core text, students will learn how to perform, design and act for the stage. They will, by the end of the week, be able to perform sections of the text over Zoom and/or design their own staging of the play.

Level 2 will be an exploration into tragedy in Shakespeare. Myles will help students recognize the elements that make Shakespearean tragedies timeless classics in English Literature, and the internal and external struggles of the protagonists. Under Myles’ guidance, students will write their own modern adaptation of a Shakespearean play.

## POLICY DEBATE (AGE 13 & UP)

For aspiring advanced and competitive debaters! Policy debate is a strategic argument between two teams on a given topic. The team in affirmation must come up with a plan, a way to support the topic, in the form of a government policy. The team in negation tries to convince the judge that the plan is a bad idea. The rest of the debate centers around whether or not the plan should be enacted. You'll be happy to find that policy debate is a healthy combination of politics, philosophy, ethics, performance, and basically whatever you want it to be. This event will prepare you for every other speech and debate event. Policy is a space where you can do whatever you want, and make it as fun and challenging as you would like it.

## GENETICS & THE WORLD (AGE 11 - 13)

Science and languages at the same time? This class takes an integrated approach that covers science, English, social issues, policy, and ethics all at the same time. From gene editing to cloning and ethics, climate change to conservation, and electricity to renewable energy, children will find themselves fascinated by the daily phenomena in nature, eager to ask questions through a new lense, stretched through occasional data analysis, and motivated to expand their perimeter of knowledge. Students will emerge as an inquisitive learner, and an empowered communicator of their wildest ideas.

**STAY TUNED**

## SOCIAL STUDIES (AGE 13 & UP)

Why are certain countries rich and others poor? What role does demography play in economic development? Why do some populations grow and some decline?

Level 1 of the Social Studies course seeks to answer these questions by considering themes related to colonialism, theories of modern economic development, differences between MEDCs and LEDCs, regional and world trade and aid. There is a particular emphasis on the influence of migration, effects of war, international jurisprudence as well as anti- and pro-natalist policies.

In Level 2, these themes are explored in depth in the context of Asia, with case studies used extensively to help students to understand the forces at play. Among the scenarios investigated to better understand the impact of wars and borders on migration are Vietnamese refugees in Hong Kong in the 1970s and recent asylum seekers from the African continent. A study of China's migrant workers provides the focus for discussing the concepts of urbanization and rural-urban migration patterns.

**Social Media Communication is an innovative program for students aged 10 – 15 years in creating, maintaining, and using their digital identity safely and responsibly in order to make a difference in their world with a cause they are passionate about. The program emphasizes the six “must-know” skills for social media: Balance, Ethical use, Privacy, Relationships, Reputation, and Online security. Through case studies, role-play, mini-debate, and sharing by practitioners/social media influencers, students will complete mini-projects in social media communication as they learn (1) how to create their social media identity and consume content safely and responsibly, and (2) how to use their social media voice to create content purposefully. The program (which consists of 3 parts) carries credits towards a TQUK-endorsed Level 1 Certificate in Social Media Communication.**
